

# N100 Financial Intelligence Platform

## Day 45 — Final Acceptance Checklist & Sign-off

Acceptance date: 19 September 2026 | Project root: C:\Users\rekal\OneDrive\Desktop\N100

### Acceptance Gates

| Gate  | Criterion                                       | Status    | Evidence                                                                                   |
|-------|-------------------------------------------------|-----------|--------------------------------------------------------------------------------------------|
| AC-01 | 92 companies                                    | PASS      | 92 companies in official universe.                                                         |
| AC-02 | ≥90% companies with ≥10 years P&L;/BS/CF        | PASS      | 84/92 = 91.30%.                                                                            |
| AC-03 | Foreign-key check = 0                           | PASS      | 0 rows returned.                                                                           |
| AC-04 | Financial ratios ≥1,100 rows and KPI coverage   | PASS      | 1,155 rows; 44 columns.                                                                    |
| AC-05 | Revenue CAGR manual checks ±0.1%                | PASS      | AXISBANK, BANKBARODA, CANBK matched within 0.001 pp.                                       |
| AC-06 | ROE: 5 companies within ±5%                     | PASS      | APOLLOHOSP 2.39%; BAJAJ-AUTO 0.43%; DABUR 4.40%; DIVISLAB 3.36%; DLF 0.60%.                |
| AC-07 | Quality filter ROE>15, D/E<1, FCF>0 gives 10–50 | PASS      | 35 companies.                                                                              |
| AC-08 | Company Profile localhost <3 sec                | PASS      | Manual verification completed.                                                             |
| AC-09 | Screener CSV valid/correct headers              | PASS      | 31 rows; 13 dashboard headers; no missing/extra headers.                                   |
| AC-10 | 5 random tearsheets no overflow/overlap         | PASS      | Manual visual verification completed.                                                      |
| AC-11 | API health HTTP 200 + DB counts                 | PASS      | HTTP 200; expected DB row counts returned.                                                 |
| AC-12 | TCS ratios ≥10 years                            | PASS      | History begins 2013-03.                                                                    |
| AC-13 | API screener matches Module 3 Excel             | PASS      | 21 API vs 21 Excel; missing=[]; extra=[]; MATCH=True.                                      |
| AC-14 | All 11 peer groups represented                  | PASS      | 11 distinct peer groups.                                                                   |
| AC-15 | 92 companies cluster IDs 0–4                    | PASS      | 92 unique companies; no null clusters; IDs 0–4.                                            |
| AC-16 | Every company has ≥1 pro and ≥1 con             | PASS      | 540 rows; 392 pro; 148 con; 92 companies; 0 missing.                                       |
| AC-17 | 92 tearsheets, each ≥50 KB                      | EXCEPTION | 91 generated, all ≥50 KB; JIOFIN skipped because only 2 complete financial years.          |
| AC-18 | ≥60 tests, 0 failures/errors                    | PASS      | 171 passed in 14.67s.                                                                      |
| AC-19 | Validation failures CSV schema                  | PASS      | 1,223 rows; required identifying/issue fields present.                                     |
| AC-20 | Analyst guide ≥10 pages + required sections     | PASS*     | 14-page guide with Screener/Dashboard sections; local PDF validation packages unavailable. |

**Overall acceptance disposition:** ACCEPTED FOR FINAL SIGN-OFF WITH ONE DOCUMENTED DATA-AVAILABILITY EXCEPTION (AC-17). No application logic or source data was fabricated to force the exception to pass. JIOFIN has only two complete financial years and is recorded in output/skipped\_tearsheets.csv.

## 23 Official Deliverables

| ID   | Deliverable            | Path / location                                       |
|------|------------------------|-------------------------------------------------------|
| D-01 | SQLite database        | data/nifty100.db                                      |
| D-02 | Load audit             | output/load_audit.csv                                 |
| D-03 | Validation failures    | output/validation_failures.csv                        |
| D-04 | Exploratory queries    | output/exploratory_queries.sql                        |
| D-05 | Financial ratios table | data/nifty100.db → financial_ratios                   |
| D-06 | Capital allocation     | output/capital_allocation.csv                         |
| D-07 | Screener output        | output/screener_output.xlsx                           |
| D-08 | Screener configuration | screener_config.yaml / project screener configuration |
| D-09 | Peer comparison        | output/peer_comparison.xlsx                           |
| D-10 | Radar charts           | reports/radar_charts/                                 |
| D-11 | Streamlit dashboard    | src/dashboard/app.py                                  |
| D-12 | Valuation summary      | output/valuation_summary.xlsx                         |
| D-13 | Cash-flow intelligence | output/cashflow_intelligence.xlsx                     |
| D-14 | Generated pros/cons    | output/pros_cons_generated.csv                        |
| D-15 | Parsed analysis        | output/analysis_parsed.csv                            |
| D-16 | Company tearsheets     | reports/tearsheets/                                   |
| D-17 | Sector reports         | reports/sectors/                                      |
| D-18 | Portfolio summary PDF  | reports/portfolio_summary.pdf                         |
| D-19 | Cluster labels         | output/cluster_labels.csv                             |
| D-20 | FastAPI server         | src/api/ + /api/v1/openapi.json + /api/v1/health      |
| D-21 | Pytest report          | output/pytest_report.html                             |
| D-22 | Analyst guide          | docs/analyst_guide.pdf                                |
| D-23 | Acceptance checklist   | docs/acceptance_checklist.pdf                         |

## Regression & Operational Evidence

- Full regression: 171 passed in 14.67 seconds.
- FastAPI health endpoint: HTTP 200 with database row counts.
- API screener Quality Compounder: 21 results, exact match with Module 3 Excel.
- Screener CSV: 31 rows, 13 headers, no missing or extra headers.
- Tearsheet output: 91 PDFs, all ≥50 KB; JIOFIN documented as an eligibility exception.
- Analyst guide: 14 pages; Screener and Dashboard sections present.
- Performance baseline and concurrent-load work were completed during Days 41–43.

## Final Sign-off

| Role                        | Name / Signature | Date        |
|-----------------------------|------------------|-------------|
| Project Manager / Team Lead | _____            | 19-Sep-2026 |
| Data Engineering Lead       | _____            | 19-Sep-2026 |
| Analytics Lead              | _____            | 19-Sep-2026 |
| QA Lead                     | _____            | 19-Sep-2026 |

**Note on AC-20:** The guide was established as a 14-page PDF during Day 44. The final local environment did not contain fitz/PyMuPDF, PyPDF2, pypdf, or pdfinfo, so this checklist records the previously verified 14-page artifact and required sections rather than installing a new validation dependency solely for sign-off.
