Pros • Revenue growing at above 15% CAGR over 5 years reflects strong business momentum • Operating profit margin above 25% indicates strong pricing power and cost discipline	Cons • Debt-to-equity ratio of 6.60 is elevated for a non-financial company and warrants monitoring • Net debt exceeding 3 times EBITDA is a high leverage ratio and limits financial flexibility • Return on capital employed below 10% suggests the business is not generating sufficient returns on invested capital
